Keynote Speaker - Jennifer Houston, NCBA President-Elect

Thursday, July 19

Morning Tour: Yellow Jacket Vegetation Project and distribution system near Coral Pink Sand Dunes. Tour and discussion will be led by rancher Hal Hamblin along with BLM range specialists Carson Gubler and John Reese.

Over the past six years, the BLM in coordination with ranchers and Utah Watershed Restoration Initiative (WRI) has completed approximately 10,000 acres of reseeded. This spring they have also installed a water distribution system that includes a solar-pumped well, storage tanks, 12 miles of pipeline, and a dozen tire troughs.
